Subject: FW: Gold King Mine Spill Dermal

Nicole:

I am one of the Dermal workgroup member who developed the Superfund RAGS Part E (I developed the ORD Dermal Exposure Assessment document in 1992 when I was in ORD), and have been serving as one of the Agency experts on Dermal Exposure. Our workgroup was contacted by ORD this morning to stand by for potential assistance on dermal exposure resulting from Gold King Mine Spill (see messages below). The other 2 members of the workgroup are Dan Stralka (R9 Toxicologist) and Mark Maddaloni (R2 Toxicologist)

I'll keep you posted if any actual work is requested from us.

Thanks,

Kim Hoang PhD, MPH

Dan

I am not sure to what extent you'll be contacted yet but I'd ask that you keep an eye out in your email. I passed your names along to Tom Burke (EPA Science Advisor) because he is working on some dermal exposure issues for the Administrator and he could possibly need some of your technical expertise as he works on the messaging.

Please forward this message on to your management to give him/her a heads up that you may get engaged a bit.

If you have questions, please give me a call.

Regards,

Eric

Subject: Gold King Mine Spill Dermal

Mark and Dan:

Eric from the ORD-LV just called me to check on my availability to help with potential Dermal Exposure to sediments at the Gold King Mine Spill, so I gave him both of your names as well as John Kissel and Annette Bunge (as potential consultants if there is a need for the latest science for site specific issues).

John Kissel: http://deohs.washington.edu/faculty/kissel_john

Annette Bunge: <http://chemeng.mines.edu/faculty/abunge/>

Eric will send an email to request for our standing by to help when needed, so that we can alert our managers.

Thanks,

Kim Hoang PhD, MPH
